

# SCAN-415B Matrix

For Wayne Kerr models 3255 and 3260

- ◇ Standard Model 415B with 15 kelvin measuring contacts
- ◇ Checking coils, coke, transformers or multi-pin PCBs or other DUT's
- ◇ Other models with 30 or more measurement points
- ◇ Supported the Wayne Kerr models 3255 and 3260
- ◇ Special relays with a tolerance of +/- 5mOhm
- ◇ Measurements LCR, Turn Ratio with winding test, delta and more
- ◇ Very high life expectancy and very high repeat accuracy
- ◇ Model 415B Open / Short calibration to 3 MHz
- ◇ USB interface control
- ◇ Hardware START and PASS/FAIL signal can be connected
- ◇ VG64 A-C kelvin pin connector, connector board or plug
- ◇ MESCO View Standard software, up to 25 test steps
- ◇ New Model 415B model replacing for 415T the already in use over 20 years
- ◇ Consideration of customer requirements is possible

## Specification:

Relays: 2C Relay  
 Volt: to 500VDC, 3260 Option  
 Switching Current: 1A  
 Strom: 1ADC, 3255/3260 Option  
 Switching Time: 1.5ms

Dimension: 28\*20\*8 cm  
 Weight: 4 Kg

## Tolerance from pin to pin

C ± 50pF

L ± 1μH

RDC ± 100mΩ

## Repeat Measurement

RDC ± 5mΩ

L ± 100nH

## Connections:

USB, Start input, PASS/FAIL output
